

Postdoctoral position in Epidemiology and Public Health
Project: Risk-based breast cancer screening vs
the standard of care in Spain.
(Ref. 2021 - ROMAN)

OFFERS:

The Epidemiology and Evaluation Group (Research Program in Epidemiology and Public Health) of the Hospital del Mar Medical Research Institute (IMIM) is looking for a PhD in a Health related field to apply for the Sara Borrell grant to work in the field of Risk-based breast cancer screening strategies.

Contract: Research Project subject to the current call of Sara Borrell.

Duration: 3 years

Salary: 26,866 €/year (subject to the current call of Sara Borrell)

PI: Dra. Marta Román

Project:

This offer is under the framework of a Horizon 2020 grant called MyPebS (My Personal Breast Screening); an international project, funded by the European Union that investigates whether a risk-based breast cancer screening strategy, based on a clinical risk score, is more effective than standard screening for women aged 40 to 69 years.

Requirements of the candidates:

- To have obtained the PhD, understanding as such the date of reading and approval of the doctoral thesis, after January 1st, 2016
- To have obtained the PhD in a center other than IMIM or have completed a postdoctoral stay abroad lasting at least one year.
- Neither having a Sara Borrell contract at the time of application nor having completed it previously.

For more information and to submit your curriculum vitae, contact Javier Louro (jlouro@imim.es).

It is essential that you send your CVA.

Deadline for submission of CV: 17 January 2020.
